DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 4-6, drawn to a method of promoting CNS neuron growth by employing forskolin and forskolin derivatives recited in claims 5-6, classified in class 514, subclass 455.
- II. Claim 7, drawn to a method of promoting CNS neuron growth by employing protoporphyrin-9, classified in class 514, subclass 183.
- III. Claims 8-12, drawn to a method of promoting CNS neuron growth by employing 8-derivatives of cAMP, classified in class 514, subclass 46.
- IV. Claims 13-14, drawn to a method of promoting CNS neuron growth by employing Sp-cAMP and Sp-8-bromo-cAMP, classified in class 514, subclass 46.
- V. Claims 15-17, drawn to a method of promoting CNS neuron growth by employing cGMP derivatives, classified in 514, subclass 45.
- VI. Claim 18, drawn to a method of promoting CNS neuron growth by employing SNAP, classified in class 514, subclass 192.
- VII. Claims 19-20, drawn to a method of promoting CNS neuron growth by employing SNAP-1 and SNAP-2, classified in class 514, subclass 8.
- VIII. Claim 21, drawn to a method of promoting CNS neuron growth by employing NOC-18, classified in class 514, subclass 565.

Art Unit: 1617

- IX. Claim 22, drawn to a method of promoting CNS neuron growth by employing NOC-3, classified in class 514, subclass 614.
- X. Claim 23, drawn to a method of promoting CNS neuron growth by employing IBMX, classified in class 514, subclass 263.34.
- XI. Claim 24, drawn to a method of promoting CNS neuron growth by employing rolipram, classified in class 514, subclass 424.

Claims 1-3 and 25-27 link(s) inventions I-XI. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 1-3 and 25-27. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/ are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. In re Ziegler, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-XI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have employed different compounds or class of compounds with vastly diverse structures. There is no core structure among the compounds of the different invention groups. Therefore, the modes of operation for the inventions are different. The search for all these different compounds encompassed by the claims would impose an undue burden to the Office.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
